THE VISION

Competition moves Thai robotics forward.

Connect companies. Grow learners.
Build projects. Show progress.

01 **COMPANIES**
Bring real challenges

02 **LEARNERS**
Build and improve

03 **PROJECTS**
Show measurable progress

A shared home for Thailand’s robotics community.

01 / CONNECT THE COMMUNITY

Two groups.
One shared opportunity.

Companies

BRING

Challenges, technology, mentors

GAIN

New ideas and visible talent

Learners

BRING

Curiosity, skills, teamwork

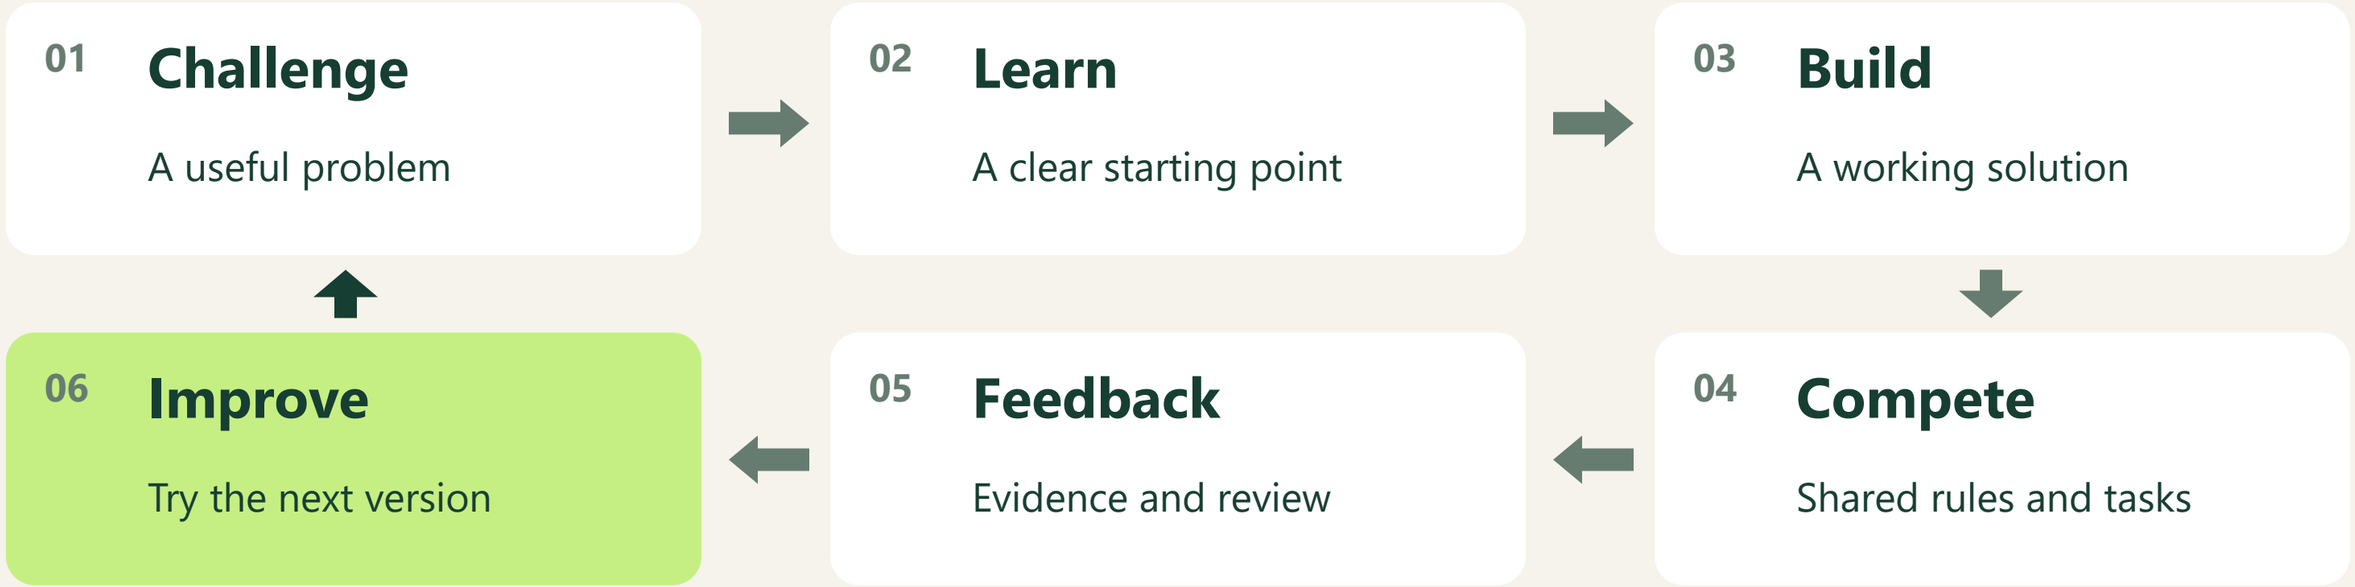

GAIN

Practice, feedback, recognition

Universities + labs + service providers support the shared journey.

02 / COMPETITION DRIVES PROGRESS

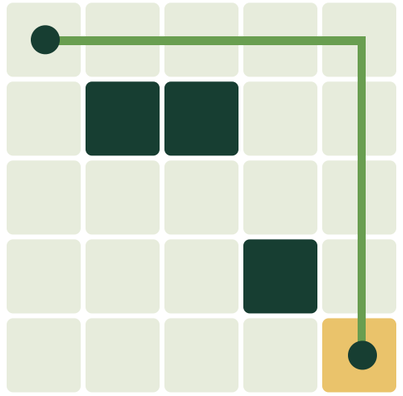

Every round should produce a better solution.

The next round turns feedback into progress.

03 / FROM CHALLENGE TO PROJECT

A clear problem.
A project teams can build and improve.

5 x 5 navigation simulation

EXAMPLE PROJECT

Get from start to goal.
Avoid the obstacles.

Write commands, run
Review the replay, improve

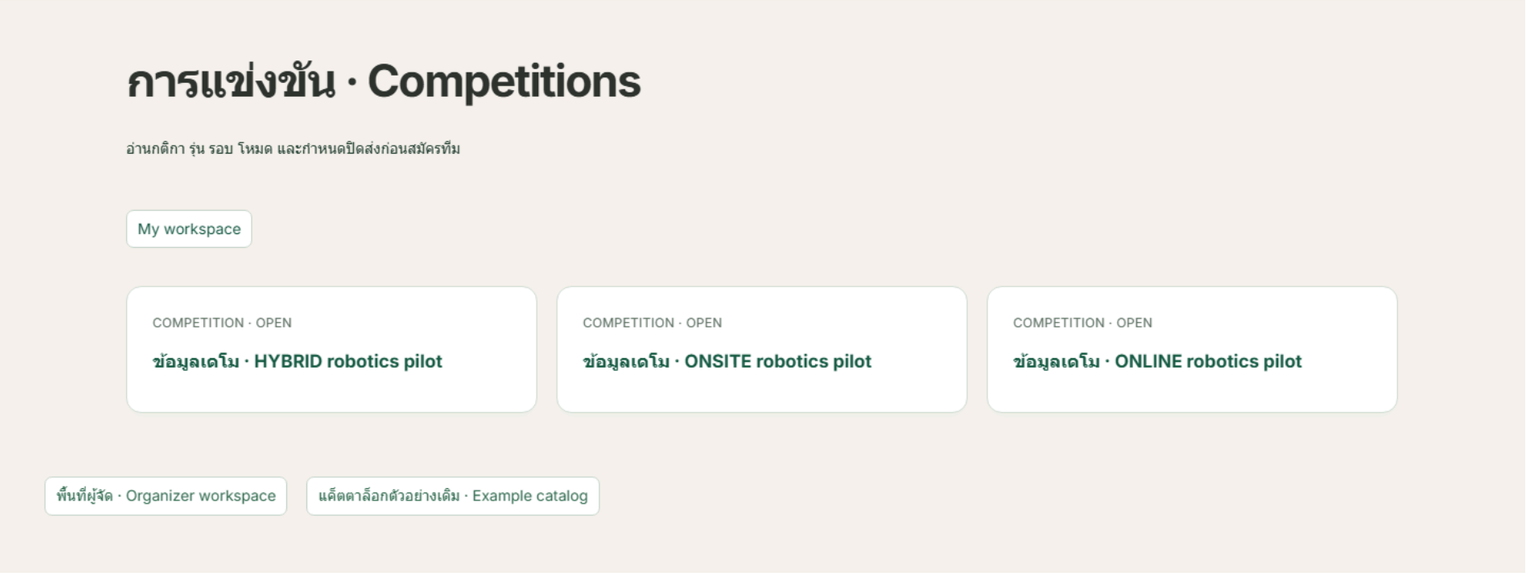

Compare each attempt

- Goal reached
- Commands used
- Collisions detected
- Replay and recorded results

Start in simulation. Grow into partner-led hardware challenges.

04 / A WORKING SOFTWARE PILOT

One platform supports the journey from learning to results.

Actual competition page • demonstration events in the software pilot

01 **Learn**

Robot discovery + lessons

02 **Practise**

Saved programs + run history

03 **Compete**

Entries + judging + results

05 / PROPOSED BUSINESS MODEL

Companies fund challenges. Teams turn them into projects.

01

Companies

Sponsor a challenge

Discover ideas and teams through reviewed projects.

02

Organizers

Pay per event

Registration, judging, appeals and result records.

03

Learners

Optional workshops

Mentored practice and project feedback.

First step: one paid company pilot. Keep introductory learning free.

One challenge.
A community that keeps improving.

1	1	1
Company partner	**Learning community**	**Robotics challenge**

Measure: completed solutions • improvement • participant feedback

Help us shape the first pilot challenge.
